

Central Commission Processing —Factsheet

What is the SensibleRez Central Commission Processing?

The SensibleRez Central Commission Processing provides hotels with an easy to use total commission settlement process. The Central Commission program allows hotels to pay commissions on reservations received electronically as well as those made directly through the hotel.

Through the SensibleRez portal, hotels can access their property's travel agent commission report and update reservations information with no-shows and cancellations.

What is the SensibleRez Central Commission Processing used for?

Simplifies the payment process.

SensibleRez Central Commission Processing reduces the workload at your hotel. Since you will issue only one cheque for all agency commissions, you will see an immediate reduction in accounting workload.

Reduced costs.

Travel agents receive one consolidated payment in their local currency. This avoids the need for you to incur costly bank charges on small foreign currency transactions.

Online Reporting.

The online travel agent commission report allows you to update all no-shows and cancellations for a more accurate commissions report. The report also provides an effective audit trail for the productivity of each agency and guest.

Customer Benefits.

There are many benefits with the SensibleRez Central Commission Processing, including:

- Easy to Use – One monthly payment.
- Consolidated payments – the agent receives commission in his local currency.
- Cost effective – avoids bank charges for small foreign payments.
- Fast & Efficient – access reports and manage reconciliations online.
- Web based – no software to install.
